

Flam – Data Analyst Intern Assignment

Objective:

Evaluate your ability to explore, analyze, and visualize data to extract meaningful insights that support product and business decisions.

You will work on three interconnected datasets that simulate user behavior, campaign activity, and engagement on Flam's Creator Platform.

Datasets Provided:

1. **users.csv** – User information (signup date, device, country, referral).
2. **campaigns.csv** – Campaign performance and credits.
3. **usage_metrics.csv** – Weekly engagement and retention data.

Section A – Exploratory Analysis

Understand user growth, activity, and engagement trends across countries and devices.
(Hint: explore signup dates, last_active_date, and session patterns.)

Section B – Behavioral Insights

Investigate how users interact with campaigns and whether certain factors influence publishing or engagement.
(Hint: consider referral users, campaign status, and credits used.)

Section C – Experience & Performance Patterns

Identify which experience types or campaign formats drive the highest user activity and engagement.
(Hint: relate experience_type to engagement metrics and publishing frequency.)

Section D – Visualization & Storytelling

Create clear visuals to narrate key findings — trends, comparisons, and correlations that highlight product or user behavior patterns.
(Hint: use a mix of bar, line, and heatmap charts to tell your story effectively.)

Section E – Insights & Recommendations

Summarize your observations and propose actionable next steps for Flam's product or marketing team.
(Hint: back your insights with data evidence and connect them to business goals.)

Deliverables:

1. A concise report or presentation (max 6 slides or 2 pages).
2. SQL or Python (Pandas) code for analysis.
3. Visualizations (screenshots or embedded charts).
4. A summary of insights and recommendations.

Evaluation Rubric:

Criteria	Weight
Data cleaning & joins	15%
SQL/Python proficiency	25%
Visualization clarity	20%
Analytical reasoning	20%
Actionable business insights	15%
Bonus (KPIs + dashboard)	5%

Submission:

Upload a folder named **Flam_Data_Analyst_Assignment_<YourName>** containing your analysis and report.

Dataset Files:

- users.csv
- campaigns.csv
- usage_metrics.csv

Submit within **24 hours** of receiving this brief.
